### Auction Site Relaunch

The new Auction Site is up and operational. We listened to your feedback on the previous site and have removed the Market Limit that triggered the close of an auction item when it reached retail value plus 20%. We understand that by its nature, Auctions are a very aggressive and competitive way to market your products and often prices soar beyond retail market value. Please note that the auction site is a free service for anyone listing their products.

### Due Diligence

With our new auction site, it is up to the bidder and their own due diligence when deciding at what price limit they are willing to bid. While our exchange still promotes the "Fair Price - Trade Component Negotiable" philosophy, this is one service our staff will not be monitoring for fair pricing value. Members can continue bidding the price up right up to the auction close.

### Auction Rules and Trade Percentages

All Sellers and Bidders must read the auction guidelines before submitting an item or placing a bid. By taking either of these actions, members are agreeing to the terms and conditions of our Bid 'n' Buy site. All items submitted to auction must be at a minimum 50% Trade. The trade component can range from 50% to 100% Trade.

**So all that is left now is for you to check it out by logging on to the secure member site and bidding on items as they are listed. Any queries can be directed to**
